RS-232 PROTOCOL COMMANDS

Baud Rate : 9600 bps, Data Bit :8 bits, Parity : None, Stop Bit :1 bit

- Each command is terminated with a Carriage Return
- Each feedback is terminated with a Carriage Return
- Code entry is CASE SENSITIVE.
- Do not insert spaces between letter/number code entries.

Note1: Feedback for a command repeats the original command.

Example, if x1\$ is a command, the feedback is the same and if the command is x2\$, the feedback would also be x2\$.

Note2: If command fails, the feedback should be "Command FAILED".
