

Fiber Optic Audio Cable

Optical cables are a must-have for any audio enthusiasts. Constructed of a High-Purity optical grade fiber, it offers an excellent signal transmission. The manufacturing process employs a sophisticated lens-polishing to make the clearest end possible. Micro convex ends are added to highly focus the beam of light. These techniques result in minimal error even with a highly distorted signal. Toslink cables are immune to Electromagnetic Interference and Radio Frequency Interference which are common to standard Audio/Video cables.

Lengths Available:

- 1m(3ft)
- 2m(6ft)
- 4m(13ft)
- 5m(16ft)
- 7m(23ft)
- 10m(33ft)
- 15m(50ft)

Colors Available:

- Black

Applications:

Primarily used to connect audio equipment like: Audio receivers, DVD players, SACD players SAT top boxes and cable boxes or any audio equipment that would utilize this type of connection.

Specs:

- High-purity optical grade fiber
- Polished lenses
- Micro convex ends
- Nylon Sleeve offers extra protection against moisture and dust
- CL2 standard rated
