

## ATLONA TECHNOLOGIES RELEASES NEWEST ADDITION TO THEIR HDMI SWITCHER LINE WITH THE 2x4 HDMI 1.3 DISTRIBUTION AMPLIFIER

Atlona Technologies, solutions manufacturer of audio video accessories, releases the newest addition to their HDMI Switcher Line with the 2x4 HDMI1.3 distribution amplifier, the AT-HD-V214

Users looking to switch two sources to multiple HDTV's are often forced to purchase both switchers and splitters in order to accommodate both their two sources, and video amplification. This issue plagues sports bars, point of sale displays, digital signage, and even presentation systems alike. Atlona Technologies has met this issue head on with their newest product; the AT-HD-V214.

Atlona Technology has been continuously expanding upon their HDMI accessory line in order to keep up to date with the latest demands in the AV industry. To further assisting these needs, Atlona has added to their HDMI Switcher line with the all new AT-HD-V214. The AT-HD-V214 is a high performance 2x4 HDMI 1.3 Distribution Amplifier designed to work as a splitter for all HD video applications. With two HDMI 1.3 Inputs this unit also boasts 4 HDMI 1.3 mirrored Outputs, allowing all outputs to switch to a specifically desired source.

Atlona's AT-HD-V214 allows any digital video source with HDMI outputs (such as: DVD, Satellite, Cable Box, PC, Xbox360, PS3 and more) to connect to upwards of four simultaneous HD displays. With the added HDMI1.3 support, there are many other attributes such as an increased single-link bandwidth. The increased bandwidth enables support for Dolby TrueHD (5.1/7.1/10.1 Ch) audio as well as a higher display resolution and deeper color depth for all four HD displays. Atlona's 2x4 HDMI 1.3 Distribution Amplifier has the ability to send HD signal great distances at resolutions up to up to 1080p or 1920x1200 and data rates up to 6.75Gps, with no signal or picture degradation. Along with being HDCP compliant and containing a supported EDID function, this unit is also DVI compliant by simply using an HDMI to DVI adapter. Multiple control options are available with this unique switcher including front panel, RS232, and IR remote.

Atlona's 2x4 HDMI 1.3 Distribution Amplifier is perfect for high quality digital signage home theater installations or commercial use including bars & restaurants, office & conference rooms, product displays and much more. The AT-HD-V214 is officially available now with an MSRP of \$499.00
