ATLONA TECHNOLOGIES HAS ADDED TO THEIR EXPANDING PRODUCT LINE WITH THE 1x16 VGA DISTRIBUTION AMPLIFIER/SPLITTER, THE AT-VGA116

Atlona Technologies, solutions manufacturer of audio video accessories, adds to their VGA Accessory Line with the new 1x16 VGA distribution amplifier, the AT-VGA116

Atlona Technologies has once again added to their ever expanding VGA product line with their all new AT-VGA116. The AT-VGA116 is a 1x16 VGA Distribution Amplifier designed to work as a splitter for any VGA Video application. Those users distributing video signal over VGA to multiple displays for digital signage, educational, and boardroom AV applications will find this splitter simple to use and install, no matter what level of AV or computer expertise. With 1 VGA Input and boasting 16 VGA Outputs, this unit is capable of splitting any signal from one VGA source to sixteen separate displays with compatible VGA inputs at the same time.

Atlona's 1x16 Distribution Amplifier has a built in amplifier, allowing this unit the capability to boost signal great distances, while preventing both signal loss as well as picture degradation. The AT-VGA116 allows cascading of up to 24 units to allow flexibility for meeting any AV Application. With a maximum bandwidth of 1GHz, this Atlona splitter will support sharp and highly defined video in multiple resolutions of up to 2048x2048, and is perfect for all Video equipment that using VGA signal such as Cable and Satellite receivers, PCs, Video Scalers, and more.

These units are perfect for in store video displays, education and worship facility applications, and especially beneficial for high quality digital signage. The AT-VGA116 is officially available with an MSRP of 479.00
